EDUCATION

Seoul National University, Seoul, Republic of Korea

M.P.H. in Health Policy and Management, Health Economics concentration (coursework completed; degree expected February 2027)
Advisor: Professor Tae-Jin Lee, Health Economics Laboratory I

The Catholic University of Korea, Seoul, Republic of Korea

B.S. in Nursing, February 2024; Registered Nurse, Republic of Korea

RESEARCH INTERESTS

Health economics; applied microeconometrics; health policy; healthcare utilization; medical expenditure and financial risk; insurance; long-term care; administrative health data; causal inference; interpretable machine learning.

SELECTED RESEARCH

- **Financial Burden and Health Investment Decisions: Panel Evidence from U.S. Households.** MEPS 1996-2023. Accepted for the 2026 APHA Medical Care Section Student Paper Award session.
- **Recovery and Recurrence after Catastrophic Health Expenditure.** Korea Health Panel 2011-2018; complementary log-log discrete-time survival analysis.
- **Spousal Hospitalization and Private Insurance Decisions.** KLoSA 2006-2024; stacked difference-in-differences and event-study analysis.
- **Dementia, Long-Term Care, and Administrative Data.** Linked Korean health insurance and social security administrative data.
- **The Hidden Cost of Childhood Behavioral Problems.** Collaborative project using PSID/CDS data.

PROFESSIONAL EXPERIENCE

Seoul National University AI Research Institute - Research Intern (July-August 2026)

Research using linked administrative health data, with work on dementia, falls, long-term care, and scalable Python-based data processing.

World Bank Group, Office of the Chief Economist for Infrastructure - Research Assistant (September 2025-February 2026)

- Supported analysis of infrastructure stocks and social rates of return on infrastructure investment across more than 150 countries.
- Worked with energy, transport, digital, and urban infrastructure data using Python, R, and Stata.
- Collected and validated India Smart Cities Mission municipal-finance data and supported cross-country indicator construction.
- Built reproducible workflows for transport mapping, capital-cost data, and World Bank Data360 analyses.

HONORS AND PRESENTATIONS

- **APHA Medical Care Section Student Paper Award Session**, San Antonio, 2026.
- **Healthcare AI Reinsurance Competition Award**, Samsung Fire & Marine / POSTECH / SNU AI, 2026.

SKILLS

Programming: Python, R, Stata; working knowledge of SAS, SQL, MATLAB, Julia, and SPSS.

Methods: Panel data analysis, difference-in-differences, event studies, survival analysis, causal inference, complex survey analysis, and interpretable machine learning.

Languages: Korean (native), English (professional), French and Japanese (elementary).

COMMUNITY AND OTHER ACTIVITIES

Hospice and disability-support volunteering; first violin and recruiting vice-director, Seoul National University Philharmonic Orchestra; violin, trumpet, museums, musical theatre, classical music, Formula 1, yoga, walks, and cafés.
