## EDUCATION

---

### Seoul National University

M.P.H. in Healthcare Management and Policy (Health Economics)

Advisor: Tae-Jin Lee. Thesis: “Household Medical Expenditure Burden and Health Behavior Adjustment”

Seoul, Republic of Korea

Expected Feb 2027

### The Catholic University of Korea

B.S. in Nursing

Seoul, Republic of Korea

Feb 2024

## RESEARCH INTERESTS

---

Health Economics; Health Policy; Applied Microeconometrics; Behavioral Economics; Aging and Long-Term Care

## RESEARCH PAPERS

---

- [1] **Seojin Kim**<sup>\*</sup>, Tae-Jin Lee<sup>†</sup>. (2026). *Income-Related Disparities in Recovery and Recurrence After Catastrophic Health Expenditure: A Longitudinal Analysis of the Korea Health Panel, 2011–2018*. The Korean Journal of Health Economics and Policy, 32(3), 1–30.
- [2] **Seojin Kim**<sup>\*†</sup>, Jimin Oh, Yeonji Jung. *Private Health Insurance Transitions Around First Observed Spousal Hospitalization in Korea*. **Under Review**, *Health Economics Review*.

## MANUSCRIPTS / WORKING PAPERS

---

- [3] **Seojin Kim**<sup>\*</sup>, Tae-Jin Lee<sup>†</sup>. *Financial Burden and Health Investment Decisions: Panel Evidence from U.S. Households*. Recipient of the **2026 APHA Medical Care Section Student Paper Award**. invited to submit to *Medical Care*. Manuscript available upon request.
- [4] **Seojin Kim**<sup>\*†</sup>, Seoyeon Jeon. *Medication-Compatible Choice During Medicare Part D Market Contraction, 2024–2026*. Manuscript available upon request.
- [5] **Seojin Kim**<sup>\*</sup>, Jongseong Lee<sup>†</sup>. *Predicting Serious Fall-Related Events Among Older Adults with Dementia Using Large-Scale Administrative Data*. Manuscript available upon request.

## WORK IN PROGRESS

---

- [6] **Seojin Kim**<sup>\*</sup>, Jongseong Lee<sup>†</sup>. *ICT-Based Care Services and Fall Among Older Adults with Dementia*.
- [7] **Seojin Kim**<sup>\*†</sup>, Jasmine Xu. *After Health Deterioration: Labor-Market Adjustment and Exit among Older Workers*.

(\* First author / † Corresponding author.)

## RESEARCH EXPERIENCE

---

**Seoul National University, Center for Social Policy & Innovation AI Modeling** **Sep 2026–Present**

Research Assistant

Supervisor: Jongseong Lee

- Continue research initiated during an internship at the SNU AI Institute, using linked administrative data to study dementia, falls, and care-service use among older adults.
- Develop models to predict serious fall-related events among older adults with dementia and apply causal inference methods to evaluate ICT-based care services.
- Contribute to economic evaluations of care services, including program costing and assessment of potential healthcare cost savings and health benefits.

**Seoul National University AI Institute**

**Jul–Aug 2026**

Summer Research Intern

Supervisor: Jongseong Lee

- Used linked National Health Insurance claims and social-security administrative data to study dementia, serious falls, and care-service use among older adults.
- Constructed longitudinal cohorts and claims-based predictors and developed initial fall-risk prediction models using linked administrative data.

**Seoul National University, Graduate School of Public Health**

**Apr–Jul 2025**

Research Assistant, Impact Evaluation of the Pharmaceutical Patent Linkage System in Korea

Funded by the Ministry of Food and Drug Safety

- Collected substance-level patent and firm financial data and produced summary statistics, tables, and analytical materials for interim reports and policy briefs.
- Assisted with surveys and focus-group interviews with pharmaceutical companies and industry associations.

## PROFESSIONAL EXPERIENCE

---

**The World Bank Group, Washington DC, USA**

**Sep 2025–Feb 2026**

Intern (Short-Term Temporary), Chief Economist Office, Infrastructure Vice Presidency

- Supported economic research on energy, transport, digital infrastructure, and urban development, including *Infrastructure Foundations: From Current Assets to Future Growth* and analytical work on India's Smart Cities Mission.
- Compiled and standardized indicators for more than 150 countries, constructed value-of-lost-load measures, and built Python/R workflows for geospatial and economic analysis using World Bank and external data sources.

## TECHNICAL SKILLS & DATA
